

使用 HttpClient 访问

```
1  public class HttpClientTest {
2
3      public static final String URL = "http://127.0.0.1:8803/";
4
5      @SneakyThrows
6      public static void main(String[] args) {
7          CloseableHttpClient client = HttpClients.custom().build();
8          HttpGet get = new HttpGet(URL);
9          HttpResponse response = client.execute(get);
10         String body = EntityUtils.toString(response.getEntity(),
11         Consts.UTF_8);
12         System.out.println(body);
13     }
14 }
```
